

IMMEDIATE RELEASE:

BioScreen to Offer Asian Subject Panels

TORRANCE, CA, August 8th, 2006 – BioScreen, a national leader in clinical testing will begin offering Asian subject panels for Repeat Insult Patch Testing (RIPT) in Mainland China.

Beginning fall 2006, Asian subject panels will run in China at a major university. All testing will be overseen by dermatologists who will manage the entire study process.

BioScreen has assembled a team with the right blend of resources and expertise to meet the ever changing regulatory scientific needs of industry. BioScreen has created a truly optimized global solution to meet your unique needs.

For additional information on studies visit us at www.bioscreen.com.

BioScreen provides clinical safety and efficacy testing for cosmetics, raw materials and industrial chemical compounds. Clinical trials are conducted under current Good Clinical Practice (GCP) guidelines.

BioScreen is a full service cGMP testing laboratory. For over 20 years, BioScreen has been providing analytical chemistry, microbiological services to the Pharmaceutical/ Biotech, Medical Device, Personal Care and OTC industries.

BioScreen Testing Services is a nationally recognized leader in the industry serving companies regulated by Governmental agencies internationally, including FDA, COLIPA and JCIA, which require testing of products prior to marketing to determine their safety. BioScreen is FDA registered and ISO 9001:2000 certified.
